Christopher McCourt

Senior Program Manager | Cross-Functional Platform Delivery | AI-Enabled Delivery

Nashville, TN (hybrid or remote) · 832-707-0730 · chris@cmccourt.net · linkedin.com/in/cmccourt · portfolio.cmccourt.net

MBA · PMP · SAFe LPM 6.0 · SAFe Scrum Master 6.0 · CSM · CSPO · AWS Certified Cloud Practitioner · ITIL v4

PROFESSIONAL SUMMARY

Senior program manager with 15+ years leading complex, cross-functional programs across healthcare IT, financial services, energy and maritime. I coordinate commitments across teams I do not manage. Today that is 14 US and offshore teams (development, business analysis, architecture, QA) delivering a legacy-platform convergence that carried $30M in audit-penalty exposure, completed on its deadline through five major scope changes. I run dependency and risk management, release and cutover planning, and reporting to senior stakeholders, and I support financial governance of an $8M portfolio in Clarity. I also build and deploy AI and cloud tooling, including an MCP-based agent in production on AWS, so I can follow what my engineers ship.

CORE COMPETENCIES

- **Technical program execution:** integrated plans, dependency sequencing, release readiness, cutover and migration planning across US and offshore teams
- **Influence and people leadership:** escalation point for cross-domain conflicts; Product Owner coaching; JAD sessions aligning product, engineering and architects; built and developed a 15-consultant PMO and a 12-person 24/7 operations team
- **Risk, decision and documentation governance:** RAID, risk and decision logs, impediment removal, executive-ready status reporting on risk, dependencies and success metrics
- **Agile at scale:** SAFe, PI planning, Scrum and Kanban; flow metrics (lead time, cycle time, WIP, aging, throughput, commitment hit rate)
- **Process, PMO build-out and financial governance:** playbooks, standardized reporting, portfolio governance in Clarity, program and operations P&L, change control

Technical skills: AWS (App Runner, ECR, Lambda, S3, CloudFront, Cognito), Azure, Terraform, Docker, Anthropic API and MCP, Jira, Clarity, Confluence, Azure DevOps, MS Project, Smartsheet, Tableau

PROFESSIONAL EXPERIENCE

Insight Global — Fortune 15 health services client Sept 2024 – Present

Delivery Manager, Care Solutions & EviCore Technology · Nashville, TN (hybrid)

- Led eP Convergence, a client-facing platform and data migration for 4 clients carrying a $30M audit-penalty exposure for missing the legacy-platform shutdown deadline. Realigned US and offshore teams through 5 major scope changes (client contract terminations, a PreCert pivot) and delivered 65+ features, 1,955+ story points and the shutdown by the Dec 2025 deadline, followed by 60 days of hypercare support.
- Lead end-to-end, client-facing delivery of the Isaac application sunset and Burden Reduction program, migrating 10 clients and their data from Isaac to the Image One platform.
- Coordinate 14 cross-functional teams across US and offshore development, business analysis, solution architecture and QA, aligning capacity to the roadmap and running weekly all-teams delivery syncs on feature status, dependencies and risks.
- Partnered with all teams and release management on every product release and on the production cutover from the legacy system to the target platform, covering release readiness and client data migration.
- Serve as primary escalation point for program-epic dependencies, risks and cross-domain conflicts. Maintain the program's risk and decision logs, report status to Director-level stakeholders and run monthly program reviews with business and IT VPs.
- Coach Product Owners on backlog prioritization and facilitate JAD sessions that align product, engineering and solution architects on technical approach. Oversee the program backlog built from the business requirements document, rolling reviewed stories up to features and program epics in Jira.
- Own flow metrics (lead time, cycle time, WIP, aging, throughput, commitment hit rate) to improve sprint reliability across the portfolio.
- Support financial governance of an $8M portfolio in Clarity: intake, estimation, change control, forecast review and actuals reconciliation, surfacing funding risk early.
- Execute within the 2026 Product & Delivery Operating Model rollout (DoR/DoD standards, role boundaries, PI planning cadences) and provide feedback on the model. The Home Health build within eP Convergence unlocked a $5.2M revenue opportunity for a national health plan.

MIGSO-PCUBED — specialty chemicals manufacturer Sept 2023 – Sept 2024

Senior PMO Consultant, Client Engagement Lead · Houston, TX (remote)

- Grew the engagement about 151% by earning expansion through delivery, from 1 SOW to 3 active SOWs across 4 technology domains under a single MSA, and forecast the PMO-services budget about 18% ($50.5K) favorable.
- Led the PMO for a 15-project, $3.6M client portfolio and served as PM on 6 of those projects ($1.6M in planned budgets), spanning cloud migration, data, ITSM, privileged access and plant systems.
- Managed an $850K engineering document management cloud migration, including UAT across 3 sites, and prepared the change request for added scope and delays that raised the PM budget from $64K to $95K.
- Provided PMO oversight (planning, RAID, change control) for a vendor-delivered Azure data-pipeline proof of concept.

Experian Partner Solutions Sept 2021 – Mar 2023

Program Manager · Austin, TX (remote)

- Led delivery of a B2B integration program embedding identity monitoring into an enterprise banking partner's client base, across a 3-party ecosystem serving 200+ B2B partners and 160M+ consumers.
- Delivered a new identity monitoring product ($1.5M projected first-year revenue), navigating 7 rounds of scope change in 4 months to reach launch readiness across API, compliance and go-to-market workstreams.
- Delivered 2 consumer-facing applications powered by AI/ML risk models, and provided delivery support to Product Management Directors across a $28M Identity & Fraud portfolio (roadmap and release planning, dependency sequencing, partner escalation).

MIGSO-PCUBED — midstream energy operator Oct 2019 – Sept 2021

Senior Project Management Consultant · Houston, TX

- Owned the budget for the Pipeline Scheduler project ($1.75M final EAC) and built its MVP Pipeline Scheduling Tool, which supported Day-1 activation of a $771M pipeline.
- Coordinated user acceptance testing across an integrated logistics stack (SAP-integrated scheduling, flow measurement, SCADA data), sequencing software against hardware dependencies.
- Pivoted scope to a deliverable MVP when vendor timelines slipped, then ran weekly demo workshops to hold vendors to the activation date.

Oceaneering International Sept 2014 – Oct 2019

Delivery Manager, Western Hemisphere | Operations Manager, AMIC · Houston, TX

- Built and owned the P&L for the AMIC 24/7 monitoring center, scaling it from launch to a ~$1.4M annual run-rate at ~40% gross margin across the Gulf of Mexico and Trinidad.
- Directed and staffed a team of 12 watchstanders to full 24/7 coverage, and built client-facing KPI and SLA reporting covering 4,700+ monthly alerts at under 1% encroachment.
- Converted the AMIC relationship into a five-month follow-on engineering engagement (application re-architecture): 4 workstreams, ~1,300 billed hours, $256.5K revenue at 39.7% gross margin; project manager on three of the four workstreams.

American Bureau of Shipping (ABS) / ABS Nautical Systems May 2006 – 2014

PMO Manager | Business Development Manager, Product Management | Senior Product Consultant · Houston, TX

- Built and led a global PMO from the ground up to 15 consultants across the Americas and EMEA, owning their performance, development and utilization, and oversaw a $2.3M Tier-1 client implementation portfolio while standardizing PM, business analysis and consulting processes across regions.
- Managed the billable NS5 inventory-scanner integration project with the U.S. Maritime Administration as sponsor and pilot: defined requirements, coordinated the vendor, and wrote and executed the acceptance test plan, including a shipboard test.

Early career: shipping operations and IT project management at Gearbulk, CP Ships and Ivaran Agencies.

AI AND CLOUD BUILDS

- **PM Agent (MCP-based portfolio management tool), in production on AWS:** ingests Jira delivery data, scores risk with a deterministic engine and layers AI judgment on top, with automated blocker root-cause analysis and feature-impact tracking. Containerized (Docker to ECR) and deployed on AWS App Runner with Terraform-managed infrastructure; every AI call passes a kill switch, approval, PII sanitization and audit log, and degrades gracefully to rules on failure.

EDUCATION, CERTIFICATIONS AND PUBLICATION

Education: MBA, University of South Florida · BA, Lock Haven University | **Publication:** Contributing author, PMO Success Story #18, *Business Driven PMO Success Stories*.
