Christopher McCourt

Agile Delivery Manager | SAFe, Scrum & Kanban | Cross-Functional Team Leadership

Nashville, TN · 832-707-0730 · chris@cmccourt.net · linkedin.com/in/cmccourt · portfolio.cmccourt.net

MBA · PMP · SAFe LPM · CSM · CSPO · AWS Certified Cloud Practitioner · ITIL v4

PROFESSIONAL SUMMARY

Agile Delivery Manager with 15+ years leading regulated enterprise delivery across healthcare, financial services, energy, and maritime. Lead Agile delivery across 14 cross-functional teams; support financial governance of an $8M portfolio. Delivered a $30M-exposure migration on deadline through 5 scope changes; grew a consulting engagement 151% at 22% under budget.

CORE COMPETENCIES

- **Agile, Waterfall and hybrid delivery:** SAFe, Scrum, Kanban, PI planning, sprint execution, Scrum of Scrums, backlog refinement, release planning, SDLC
- **Agile coaching and facilitation:** Product Owner coaching on backlog prioritization, story review and rollup to features and program epics, JAD sessions, cross-team technical alignment
- **Agile metrics:** lead time, cycle time, WIP, aging, throughput, velocity, commitment hit rate
- **Risk and governance:** impediment removal, dependency and risk management, decision management, executive-ready reporting
- **Financial oversight:** portfolio governance (Clarity), engagement and operations P&L, forecasting, change control
- **Product-centric delivery:** roadmap and release sequencing, Stage-Gate business cases, SAFe LPM, CSPO
- **Cross-functional leadership:** US and offshore development, business analysis, architecture and QA; vendors and SIs
- **Consulting delivery:** SOW scoping and expansion, rate-card staffing, program recovery, PMO build-out and playbooks
- **AI-enabled delivery:** MCP-based portfolio tooling, flow metrics and delivery analytics

PROFESSIONAL EXPERIENCE

Insight Global — EviCore by Evernorth

Delivery Manager — Nashville, TN · Sept 2024 – Present

- Lead end-to-end Agile delivery of a legacy application sunset and Burden Reduction program, migrating 3 enterprise healthcare customers onto one consolidated utilization management platform.
- Coordinate 14 cross-functional Agile teams across US and offshore development, business analysis, solution architecture, and QA, aligning capacity to the release roadmap. Run weekly all-teams delivery syncs covering PI feature status, backlog priorities, dependencies, risks, and Jira hygiene.
- Partner with Scrum Masters across the sprint cadence and PI planning across 14 teams, keeping team commitments aligned to PI objectives.
- Coach Product Owners on backlog prioritization to keep the program backlog aligned to PI objectives and ready for execution.
- Facilitate JAD sessions to align product, engineering, solution architects, and cross-functional teams on technical approach.
- Oversee the program backlog built from the business requirements document. Review user stories for completeness through refinement rounds and research spikes, and roll stories up to features and program epics in Jira, traced to the E2E testing critical path.
- Support financial governance of an $8M portfolio in Clarity: intake, estimation, change control, forecast review, and actuals reconciliation, surfacing funding risk to program leadership early.
- Led a platform migration carrying a $30M audit-penalty exposure for missing the legacy-platform shutdown deadline. Realigned US and offshore teams through 5 major scope changes and delivered 65+ features, 1,955+ story points, and the shutdown by the Dec 2025 deadline.
- Partnered with all teams and release management on every product release and on the production cutover from the legacy system to the target platform.
- Delivered the Home Health build, which unlocked a $5.2M revenue opportunity for a national health plan.
- Serve as primary escalation point for program-epic dependencies, risks, and cross-domain conflicts. Identify and remove impediments to team delivery, and report status directly to Director-level stakeholders.
- Own Agile flow metrics (lead time, cycle time, WIP, aging, throughput, velocity, commitment hit rate) to improve sprint reliability and hold teams accountable to planned PI outcomes. Execute within the 2026 Product & Delivery Operating Model rollout (DoR/DoD standards, role boundaries, PI planning cadences) and provide process-improvement feedback on the model.

MIGSO-PCUBED — Indorama Ventures (Indovinya)

Senior PMO Consultant, Client Engagement Lead — Houston, TX (remote) · Sept 2023 – Sept 2024

- Grew the engagement ~151% by earning expansion through delivery, from 1 SOW to 3 active SOWs across 4 technology domains under a single MSA.
- Closed the engagement 22% under budget, with every workstream favorable, by staffing against a published PM rate card.
- Provided PMO oversight (planning, RAID, change control) for a vendor-delivered Azure data-pipeline proof of concept. Drove process improvement by rebuilding the risk, continuous-improvement and onboarding playbooks.

Experian Partner Solutions

Program Manager — Austin, TX (remote) · Sept 2021 – Mar 2023

- Provided delivery support to Product Management Directors across a $28M Identity & Fraud portfolio: quarterly roadmap and release planning, dependency sequencing, release readiness and partner escalation.
- Led delivery of a B2B integration program embedding identity monitoring into an enterprise banking partner's client base, across a 3-party ecosystem of 200+ B2B partners and 160M+ consumers.
- Delivered a new identity monitoring product ($1.5M projected first-year revenue), navigating 7 rounds of scope change in 4 months to reach launch readiness across API, compliance, and go-to-market workstreams. Delivered 2 consumer applications powered by AI/ML risk models.

MIGSO-PCUBED — midstream energy operator

Senior Project Management Consultant — Houston, TX · Oct 2019 – Sept 2021

- Owned the budget for the Pipeline Scheduler project ($1.75M final EAC) and built its MVP Pipeline Scheduling Tool, which supported Day-1 activation of a $771M pipeline.
- Coordinated user acceptance testing across an integrated logistics stack (SAP-integrated scheduling, flow measurement, SCADA data), sequencing software against hardware dependencies.
- Pivoted scope to a deliverable MVP when vendor timelines slipped, then ran weekly demo workshops to hold vendors to a fixed activation date.

Oceaneering International

Delivery Manager, Western Hemisphere | Operations Manager, AMIC — Houston, TX · Sept 2014 – Oct 2019

- Built and owned the P&L for the AMIC 24/7 monitoring center, scaling it from launch to a ~$1.4M annual run-rate across the Gulf of Mexico and Trinidad. Managed job-profit margin from ~80% to a deliberate ~40% while staffing to full 24/7 coverage.
- Directed a team of 12 watchstanders and built client-facing KPI and SLA reporting covering 4,700+ monthly alerts at under 1% encroachment.
- Converted the AMIC relationship into a five-month follow-on engineering engagement: 4 workstreams, ~1,300 billed hours, $256.5K revenue at 39.7% gross margin; project manager on three of four workstreams.
- Grew a Field Wi-Fi engagement from a $20.7K pilot to $848K in awarded project work, including a $130K proof of concept (4 sites) and a $370K follow-on (15 sites).
- As full-time business analyst on a NASA asset-management system replacement (2015–2016), developed the requirements specification, traced contract requirements to development stories, and added acceptance criteria as implicit requirements emerged during Agile delivery. Modeled system actors and workflows in use-case diagrams.

American Bureau of Shipping (ABS) / ABS Nautical Systems

PMO Manager | Business Development Manager, Product Management — Houston, TX · May 2006 – 2014

- Built and led a global PMO from the ground up to 15 consultants across the Americas and EMEA, with ownership of performance, development, and utilization. Oversaw a $2.3M Tier-1 client implementation portfolio and standardized PM, business analysis, and consulting processes across regions.
- Built business cases and Stage-Gate processes and supported launches of scanner-integration, MARAD, and condition-monitoring products – pilot client. The scanner business case projected a ~$3M market (a forecast, not revenue).

AI-ENABLED DELIVERY TOOLS

- PM Agent (MCP-based portfolio management tool): built an MCP integration that coordinates a multi-methodology portfolio (SAFe, Scrum, Kanban) with automated blocker root-cause analysis, feature-impact tracking, CSV ingestion and HTML dashboard generation. In production on AWS.
